

# LABeler™

## Handheld Laboratory Label Maker

Identifying and organizing increasingly large numbers of samples has become an important objective for today's busy laboratory. The process of writing on sample tubes & containers can be messy and unreliable. It can also be difficult to find the time to access a computer and design a layout for expensive ink jet labels. The new LABeler Lab Printer™ provides the convenience of a lab marking pen with the benefits of a large desktop printer. Simply type in the desired information using the 50+ button key pad and press the print key...just press the cut lever and your label is instantly ready for application.

With over 12 available sizes, colors & material combinations, the LABeler is ideal for label identification of any laboratory vessel for nearly any laboratory application. Standard label tapes can be autoclaved, boiled or even frozen to temperatures as low as -50°C. Special Ultra-Low label tapes are also available for storage in -196°C environments or for liquid nitrogen applications.

- **Lightweight, handheld operation**
- **Variety of label tapes for many tube sizes**
- **Built in cutter - no need for scissors**
- **Prints a variety of barcodes**
- **“Ultra-Low” tape for liquid nitrogen storage**
